Exercise 2

Q1

① COUNT FUNCTION

SELECT COUNT ID AS total_employees
FROM employees_db;

total_employees
10

② SELECT SUM SALARY AS TOTAL_salary
FROM employee_db
WHERE department = 'IT';
employee_db

Department	salary
IT	220 000

③ SELECT AVG salary AS average_salary
~~FI~~ WHERE department = HR
FROM employee_db;
employee_db

average_salary	~~HR~~ department
49500	HR

Scanned with CamScanner

Q4

SELECT SALARY
FROM employee_db
GROUP BY 'salary' DSC;

employee_db

salary
62 000
60 000
59 000
55 000
53 000
53 000
52 000
51 000
50 000
48000

SELECT DSC salary
FROM employee_db

Q5

SELECT sum salary as total_salary
FROM employee_db
GROUP BY department;

total_salary	department
220 000	IT
99 000	HR
119 000	FINANCE
105000	MARKETING

Scanned with CamScanner

Q6

```
SELECT City,
COUNT ID AS total-employee
FROM employee_db
GROUP BY 'CITY';
```

total-employee	CITY
2	NEW YORK
3	CHICAGO
2	Los Angeles
2	San Francisco
1	HOUSTON

Q7

```
SELECT AVG salary as average-salary,
department
FROM employee_db
GROUP BY department
Order by salary Desc;
```

Department	Avg-salary
IT	55000
Finance	59500
Marketing	52500
HR	49500

Q8

```
SELECT sum salary as total_salary
FROM employee_db
Having salary > 100 000
GROUP BY department;
```

Scanned with CamScanner

Department	Salary
IT	220000
FINANCE	119000
MARKETING	105000

Q9

```
SELECT COUNT ID AS Total_employee,
                    city
        FROM employee_db
    GROUP BY city
    Having (total_employee) > 1
        ORDER BY ID Desc;
```

City	total_employee
Chicago	3
New York	2
Los Angeles	2
San Francisco	2

Q10

```
SELECT AVG salary AS average_salary,
                    department
    FROM employee_db
    GROUP BY department
    Order by (average_salary) Desc;
```

Department	ave_salary
Finance	59500
IT	55000
Marketing	52500
HR	49500
